ARCHITECTURAL MILLWORK

ARCHITECTURAL MILLWORK

General Information

Elias Woodwork specializes in manufacturing products that are designed for a specific project. Most products required are not displayed in this catalog nor any catalog in the industry. Generally certain designs require items so custom that only templates or architectural drawings are used to manufacture.

From projects in the past to current, we have become familiar with certain applications for such customized materials.

Many larger, high end industries do not have the quantity of options of manufacturers when outsourcing the wood products used in many of today's buildings, businesses and recreational vehicles.

Currently Elias Woodwork is used in custom quality industry applications such as:

- Bank Interiors
- Yacht Re-fitting
- Retail Store Fixtures
- Hotel Furniture and Interiors
- Restaurant Furniture and Interiors
- RV Furniture and Interiors
- Stock Kitchen and Vanity Components
- Museum Interiors
- Golf Course Locker Rooms

Be sure to call an Elias Woodwork Representative when you are unsure where to have any wood product manufactured.
